Work Experience

Freelancer – Fullstack Web Developer

05.2024 – current
Berlin

- Developed custom web applications and websites for **small businesses** and **individuals**, focusing on improving digital presence and client acquisition.
- Utilized modern technologies such as **Next.js**, **Node.js**, and **TypeScript** to create scalable and user-friendly solutions.
- Built several websites as part of my portfolio to attract potential clients and successfully complete projects

Personal Development

10.2023 – 03.2024
Berlin

Took a brief career break to upskill, learn new technologies, and prepare for my return to Fullstack Web Development.

Software Developer

08.2022 – 08.2023
Berlin

IBYKUS AG

- Developed and maintained internal applications and systems using **PL/SQL** and company-specific frameworks for **managing subsidies**.
- Automated and optimized processes in collaboration with cross-functional teams.
- Implemented and maintained **database solutions** to improve the efficiency of internal workflows.
- Utilized **Git** and **CVS** for version control and an internal ticket system to organize tasks in an **agile environment**.
- While successful in this role, I realized my passion and strengths lie in modern **Fullstack development**, prompting my career shift in this direction.

Fullstack Web Developer

05.2019 – 09.2020
Chemnitz

Chemmedia AG

- Developed the **Knowledgeworker-Share** platform in **Fullstack**, focusing on **frontend (Angular)** and **backend (PHP)**.
- Extended the cloud management system and handled general support requests.
- Independently executed complex projects that were highly appreciated by colleagues and supervisors.
- Extensive use of **Git** for versioning and **Jira** as a ticketing system to work efficiently in an agile team.
- Paid close attention to **Clean Code** principles to ensure maintainability and scalability, following **best practices** and regularly conducting **code reviews**.
- Contributed to the design of new features and their technical implementation, including coordination with team requirements.

Education

Bachelor's Degree in Applied Computer Science

Technische Universität Chemnitz

Specialization: Computer Graphics

04.2017 – 10.2023

Chemnitz
